Fullstack developer with nearly two years building enterprise applications using ASP.NET Core, .NET 10, React 19, and SQL Server. Works across that stack, from SQL through to the React screens. Earlier backend work includes Go API development at Telkom DBT and PHP/Laravel financing flows for BMT cooperatives.

EXPERIENCE

Software Programmer
PT Artha Infotama (Artha IT Group), Jakarta, Indonesia
Jan 2025 – Present

- Web ERP: build ASP.NET Core applications (MVC and Web API) on SQL Server: approval modules on .NET 10 and React 19, REST endpoints that read the Dynamics GP tables, and Hangfire background jobs.
- Field-level permissions: implement per-company rules for which ERP fields each user can see or edit, enforced in the database.
- Approval documents: co-design a single table holding metadata, HTML form definitions, approval steps and approval status.
- Microsoft Dynamics GP: build new forms with Dexterity in the HR and payroll module, with full CRUD and validation, plus RDL reports on GP data.

Fullstack Developer
PT Cerebrum Edukanesia Nusantara, Bandung, Indonesia
Jun 2023 – Aug 2023

Built a platform for BMT (Baitul Maal wa Tamwil) cooperatives using PHP and Laravel, covering monetary and goods financing flows aligned with Islamic finance principles.

Back End Developer
Telkom DBT (Digital Business & Technology), Bandung, Indonesia
Mar 2023 – Aug 2023

Contributed to a dynamic website API builder written in Go on top of Telkom's internal codebase, covering REST endpoint design and backend fundamentals in a teaching-factory engineering team.

Web Developer Intern
DILO (Digital Lounge), Balikpapan, Indonesia
Jun 2018 – Sep 2018

Built a buying-and-selling marketplace for small and medium enterprises in Balikpapan using PHP and Laravel, including the front-end design.

PROJECTS

Backend Developer
Sahabat CGI Application
Feb 2024 – Sep 2024

Final-year university project: REST API backend in Go and Gin for a mobile app used by the Sahabat CGI community to record and manage LGK cancer patient data, with structured data entry and progress monitoring for doctors and administrators.

Web Developer
Axtorix Website
Sep 2023 – Dec 2023

Artist job marketplace in PHP and Laravel: artist profiles, job search, and applications, with the backend and interface supporting interactions between artists and employers.

Web Developer
CCLaundry Website
Jun 2022 – Dec 2022

Laundry service website for the area around Telkom University, built with the CodeIgniter framework, including tracking of ongoing laundry orders.

EDUCATION

Bachelor of Science in Computer Science (S.Si.Kom.), Software Engineering
Telkom University, Bandung, Indonesia
Sep 2020 – Sep 2024

GPA 3.68, Cum Laude.

Vocational High School, Software Engineering
SMK Negeri 2 Balikpapan, Balikpapan, Indonesia
Sep 2016 – Sep 2020

SKILLS

Languages: C#, TypeScript, JavaScript, Go, PHP, SQL
